**Subject:** Red and Bonita Site - July 27 week

Kirstin,

The underground work on R n B will include raise the back on a short section of the adit and one timber set that are low in the first 10 feet inby of the portal, which cause the crew to have to duck while entering. Hopefully this will be accomplished Monday and Tuesday, and then the remainder of the mucking of the solids will be completed by Friday. We have some preliminary work / set up at Gold King underway also. The ERRS and START crew will be doing some work on the treatment system pond and the Gold King water management set up while until the mucking is underway again.

If you are able to go to the site this week, just let Matt and Elliott know your plans.

I will be in the office Tuesday and Wednesday, and then leave the remainder of the week through next week traveling. Hays Griswold will be onsite August 3<sup>rd</sup> week; his cell is (303-886-1633).

Thanks for your help.

Steve
